RAINFALL DATES:14&15 SEPTEMBER

JANAMASHTAMI CELEBRATION

Kindergarteners were appraised about the significance of Janamashtami, the festival was celebrated with full zeal and vigour. The little artists showcased amazing performances on this occasion. Krishna, Radha and Gopis looked adorable in their traditional attires. The entire arena was transformed into a land of joy, celebrations and happiness. Students of KG II visited a temple. The young students were in a celebratory mood & offered prayers.

EKTA DHAWAN PRINCIPAL

YES! Kids love to hear when they're doing great and behaving well. But too much positive reinforcement can backfire. One must learn how to strike a balance between praise and punishment. When a child is learning a new behaviour or working on a specific skill, it's important to offer positive reinforcement on a consistent basis. It allows us to tap into our children's individual strengths, draw attention to their personality traits and interests, and as a result give us an opportunity to connect, communicate effectively and ultimately empower them to be more of them. But for this, one must be closely attuned to the children's interests and should have a good map of their emotional world.

SONIA BAJAJ

Mother of Ridit Bajaj KG-II C

A school can function as the center of a person's community and can act as a place for children to grow. The environment at Bawa Lalvani Public School offers students with an opportunity to learn to work in groups which is a very important "real world" skill. The school doesn't merely teach about facts and figures, numbers and letters but it crucially focuses in preparing the students to become their future selves. We really appreciate the dedication of whole BLPS team in providing the quality education and atmosphere for our children.

INDEPENDENCE DAY AT SCHOOL

Kindergarteners celebrated 'Independence Day 2019' with fervour & joy. Kindergarten Instructors engaged themselves to celebrate the National Festival with the young students and made them aware about the importance of the National Flag. Kindergarteners came to school dressed for the occasion. They enchanted the National Anthem with patriotic fervor.

LEARNING SHAPES THROUGH PAPER CUT-OUTS

With the objective of enabling the little one's to co-relate the different shapes with real life objects, Kindergarteners made illustrations of various objects using paper cut-outs of different shapes. Sannia (Kindergarten Instructor) assisted the young students in the activity. This craft activity aided in the development of creativity and an innovative mind.

SWIMMING IS FUN

Keeping the motive in mind to enhance endurance and streamlines breathing, the tiny tots of Nursery were actively engaged in Swimming Lessons. The Swimming Lessons involved learning to float aided with air tubes and practicing paddling by stretching limbs.

STORY LISTENING AND READING ACTIVITY

To develop the cognitive ability of the children, Our Kindergarteners were engaged in 'Story Listening & Reading' Activity' outdoors. Such Story Reading Sessions are rather engrossing & aims at developing a joy of reading in young students at an early age.

TEACHER'S NOTE

The teaching profession requires total dedication, devotion and a loving commitment. My educational philosophy is to create a learning environment that is fun and exciting. I want to inspire my children to learn more about themselves and the world around them. My role during this formative time of a child's brain development is essential. Early learning experiences are crucial factors for emotional, intellectual, cognitive, social, physical development. I have a gift and each day I thank God that I can make a positive difference in the lives of children. I am proud to say, " I am a pre-school teacher."

Manjula, K G Teacher
