AFFILIATED TO C.B.S.E NEW DELHI (AFFILIATION NO.1630328)

HOLIDAYS: 11th & 29th March 2021

### SENSORY PATH

Our Preschoolers studying in Nursery were engaged in Sensory Experiences in School. We've got our Preschoolers covered, with research into their significance in child development - indulging in sensory play helps our Preschoolers learn and develop a greater understanding of the world by using their five senses - Taste, Touch, Smell, Hearing & Sight. Each day our Preschoolers experience life through the use of these senses.

### NUTRITIONAL VALUE OF PULSES

It's 'World Pulses Day 2021' in observance our Kindergarteners Grade KG II were actively engaged in an understanding of Pulses. These are important to our diets, especially in a world which continues to be ravaged by COVID-19. Our Kindergarteners were made aware that apart from being relatively inexpensive, pulses are loaded with nutritional value and densely packed with proteins and iron, typically containing twice the amount of that found in whole grain cereals and three times that of rice.

### MOTOR SKILL LEARNING

We endeavor to raise self-reliant kids, getting their hands on workshop tools excites kindergarteners. Our Young Students studying in Grade KG-1 dedicate time daily, learning 'tool handling' on the Motor Skills wall. It's important to instill tool knowledge in kids early in their lives - equally important to teach them how to enjoy working and gaining new skills and it all starts at home. Kids will always remember the first set of tools they lay their hands on.

### SHOT PUT BASKET

Grade KG I students were actively engaged in learning & practicing a 'Throw', a game of aim and shoot that requires coordinated body movements, and there's a mental aspect that will allow young children to eventually propel a ball through the air and into the hoop. Our kindergarteners are in the Guided Discovery stage. Everything they do is outcome-based with an emphasis on fun.

**DR. EKTA DHAWAN**  
PRINCIPAL

Dear Parents

Kindergarten is a place where we have committed ourselves to the vision of raising achievement, raising aspirations and enriching partnerships. It is the forefront of early childhood educational development. I firmly believe that young children are naturally curious learners and have a right to joyful experiences. Our learning environment creatively meets the specific needs of each child, while allowing all students to come together from cross cultural experience that develops their social skills and teaches them how to build friendship. We provide a happy and safe environment within which our students can experience opportunities inside the class and beyond. With gentle care, we help shape their young minds to be ready for the world that is waiting to meet them. Through quality teaching, students support and our commitment to extracurricular activities, we create building blocks for success that will give them an advantage in their later years. Together with a team of committed and caring teachers we will continue to make every child's learning journey here a meaningful and memorable one. God Bless us all!

**Kanu Puri**  
Mother of Paarika (KG II - A)

I am the proud mother of Paarika of KG-II A. It is a matter of a great pleasure to write few words about BLPS which has proved as an excellent, outstanding and prominent school among the district schools of Kapurthala. Before the admission of my daughter, I tried my best to find the most suitable school with pleasant atmosphere and provision of sports, activities and discipline. Today, when I see a change in my daughter's confidence level, her way of communication with the change in scenario makes me happy. School is not providing theoretical knowledge but also practical knowledge to move in society. I am proud to write that this school has been the appropriate, useful and beneficial in all aspects. I appreciate the arrangements done by Principal Ma'am and staff for the betterment of the students. I wish that this school may progress by leaps and bounds.

## LOGICAL AND REASONING SKILLS ENACTMENT

Our Kindergarteners Grade KG II were actively engaged in a daily lesson 'Excited about Maths' - learning basic shapes, special words and a little counting, adding and subtracting. In its most introductory form, they're beginning to learn the essence of mathematics: logical thinking and problem solving. They find it fascinating to compare two objects by their length, weight, size & learn to identify the four basic shapes: circles, triangles, squares and rectangles.

## LEARN TO FASTEN

Our Preschoolers studying in Grade Nursery were actively engaged in practicing how to Zip, Button & more in a daily activity, 'Learning to Fasten' a great bilateral coordination routine, encouraging younger kids to start and practice manipulation skills while getting both hands working together efficiently.

## TRICYCLE RIDING

Our kindergarteners Studying in KG-1 were actively engaged in daily riding practice on 'Tricycles'. It's an all-time fun activity, you can find kindergarteners pedaling easily and regulating their tricycle efficiently. But what benefits does a child get? It's probably a most effective way to improve balance and coordination of various parts of a young students body. It also provides great comfort and enjoyable experience.

## TEACHER'S MESSAGE

My teaching experience in BLPS is one of the best experience of my career. Being a teacher, it is challenging for me most of the times, but teaching is also a rewarding work. During this stressful situation, it is important to be optimistic and stay positive. The best thing about being a teacher is that working with children could be lot of fun. They make you laugh, touch your heart and give you hope.

"Proud to be a Teacher"

Jaspreet Kaur  
KG Instructor

## CIRCLE HOUR : CONVERSATION

Q1. Where do you go when you are sick?

Ans. I go to the hospital when I am sick.

Q2. Where are thieves locked up?

Ans. Thieves are locked up in the police station.

Q3. Where do you go to study?

Ans. I go to school to study.

Q4. Where do you go for fun?

Ans. I go to the park for fun.

## SONG OF THE MONTH

February is month number two,  
The shortest month it is true,  
With twenty-eight days all in a line,  
But in a leap year, there are twenty-nine.

There are so many things you can do in the snow,  
Snowmen to build and snowballs to throw,  
Grab a sled and race down a hill,  
Laughing, smiling with such a thrill.
